REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the present invention relates to a noise reduction method for a memory device. The independent claims 1 and 17 recite a method and an apparatus for controlling noise of a semiconductor memory device comprising a first circuit that outputs at least one first signal for first operation in accordance with first operation sequence; and a second circuit that outputs at least one second signal for second operation executed separately from the first operation in accordance with second operation sequence, wherein the second circuit is controlled by at least one predetermined first signal out of the at least one first signal, and an output of at least one predetermined second signal out of the at least one second signal is delayed. The PRIOR ART fails to disclose a method and an apparatus for controlling noise of a semiconductor memory device by delaying an output of at least one predetermined second signal out of the at least one second signal as described in the independent claims 1 and 17, therefore, claims 1-32 are in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
